

Autolite®

Has Applications for All Types of Small Engines

The brand offers plugs for a wide range of motorcycles, watercraft, go-karts, snowmobiles, snow blowers, lawnmowers and other outdoor power equipment.

The Autolite® Small Engine spark plug has a unique anti-fouling design that provides better performance over its life, making it superior to original equipment spark plugs, which have a larger size diameter center wire that requires a higher voltage to spark. The plugs feature a center and side electrode, nickel-plated rolled threads and a steel shell.

Autolite® is one of North America's largest producers of premium Original Equipment and aftermarket spark plugs. The brand has been around for over 65 years and continues to produce premium, innovative products.
